

PREPARED FOR EDWARD @ BLINDER LAW FIRM
BLINDERLAW.COM

Website Audit

Your 48-Hour Growth Diagnostic

We crawled **100 pages** across blinderlaw.com and identified **24 high-leverage improvements** across 4 conversion pillars. Here's where you're losing visitors — and the fixes that ship in 48 hours.

■ Technical issues **93%** ■ Healthy **5%**
■ Blocked **1%** ■ Redirected **1%**

CRITICAL FINDING · Only **5%** of your pages are healthy. The remaining 95% are leaking conversions across at least one of the four pillars below.

THE 4 PILLARS · WHERE TO FOCUS

Ranked by 48-hour impact-to-effort ratio

01 HIGH PRIORITY CONVERSION

Upgrade Your Hero Section

Replace the vague hero with a benefit-driven headline, sharp subheadline and one dominant CTA. Visitors decide in under three seconds — the current hero answers none of "what, for whom, why now."

EFFORT
● ● ●
~6 hrs

EXPECTED LIFT
+15–30%

02 QUICK WIN CONTENT

Add an Exit-Intent Capture

Trigger a compelling offer the moment users move to leave. Industry data shows exit-intent recovers 5–15% of abandoning visitors and turns them into leads with no extra traffic spend.

EFFORT
● ● ●
~3 hrs

EXPECTED LIFT
+5–15%

03 MED EFFORT TECHNICAL

Remove Friction From Your CTA

Cut form fields to the essentials, enforce one primary CTA per page, and place trust signals directly next to the button. Every extra click is lost revenue and a chance for hesitation.

EFFORT
● ● ●
~10 hrs

EXPECTED LIFT
+10–25%

04 QUICK WIN TRUST

Surface Trust Signals Above the Fold

Move reviews, awards, bar admissions and case-result figures into the upper viewport and right next to each CTA. Trust at the moment of decision lifts conversions 8–20% with zero code complexity.

EFFORT
● ● ●
~4 hrs

EXPECTED LIFT
+8–20%
