Your 48-Hour Growth Diagnostic

SITE HEALTH OVERVIEW

Crawled pages diagnostic - 100 pages

CRITICAL WARNING

93% of crawled pages have technical issues. Only 5% are healthy.

Have technical issues	93%
Healthy	5%
Blocked	1%
Redirect	1%

RECOMMENDATIONS

24

Across 4 priority pillars

Conversion	8	Content	7
Technical	6	Trust	3

TOP 3 SUGGESTIONS FOR 48-HOUR GROWTH

Where to focus first

#1

HIGH PRIORITY

Upgrade Your Hero Section

CLARITY + CONVERSION FOCUS

Replace the vague hero with a benefit-driven headline, subheadline, and one dominant CTA. Visitors decide in under three seconds.

EXPECTED LIFT +15-30%

#2

QUICK WIN

Add an Exit-Intent Pop-Up

CAPTURE LOST CONVERSIONS

Trigger a compelling offer when users leave. Recovers 5-15% of abandoning visitors and turns lost traffic into leads.

EXPECTED LIFT +5-15%

#3

MED EFFORT

Remove Friction from Your CTA

SIMPLIFY THE PATH TO CONVERSION

Cut form fields to essentials, one primary CTA per page, and place trust signals near the button. Every extra click is lost revenue.

EXPECTED LIFT +10-25%

FORECASTED IMPACT

Industry benchmarks for these fixes

Conversion rate +15-25%

Lead capture +5-15%

Bounce reduction -10-20%
