Your 48-Hour Growth Diagnostic

SITE HEALTH OVERVIEW

Crawled pages diagnostic · 100 pages

93% CRITICAL

of crawled pages have technical issues. Only 5% are healthy.

RECOMMENDATIONS

24

High-impact fixes ready to apply across content, conversion, and technical layers.

ACROSS 4 PRIORITY PILLARS

TOP 3 SUGGESTIONS FOR 48-HOUR GROWTH

Where to focus first

#1

Upgrade Your Hero Section

CLARITY + CONVERSION
FOCUS

Replace the vague hero with a benefit-driven headline, supporting subheadline, and one dominant CTA. Visitors decide in under three seconds.

#2

Add an Exit-Intent Pop-Up

CAPTURE LOST
CONVERSIONS

Trigger a single, compelling offer when users go to leave. Recovers 5–15% of abandoning visitors and turns lost traffic into leads.

#3

Remove Friction from Your CTA

SIMPLIFY THE PATH TO
CONVERSION

Cut form fields to essentials, use one primary CTA per page, and place trust signals near the button. Every extra click is lost revenue.
